

## UEP Feedback – Employee Module

### 1 Scenario / Problem Statement

Need a system to collect UEP feedback from employees to understand how the program helped individual to work better in project.

### 2 User Stories

2.1 As a unified engineer I should be able to provide feedback about unified engineer so that I can share my view points on how the program helped me to improve my productivity

#### Acceptance criteria

- System should provide list of parameters given below against which the user can share his/her feedback.

Category	Feedback Question
General	To what extent the UEP helped you to become a better Fullstack Engineer?
General	To what extent the UEP helped you to perform better in the project?
Technology Fundamentals	Choose the most useful courses?
Technology Fundamentals	Choose the least useful courses?
Technology Fundamentals	Name other courses that you look forward to in your competency?
Behavioral & Soft-skill Fundamentals	Choose the most useful courses?
Behavioral & Soft-skill Fundamentals	Choose the least useful courses?
Behavioral & Soft-skill Fundamentals	Name the courses that you are looking forward for?
Digital & Platformation Fundamentals	Choose the most useful courses?
Digital & Platformation Fundamentals	Choose the least useful courses?
Digital & Platformation Fundamentals	Name the courses that you are looking forward for?
Software Engineering Fundamentals	Choose the most useful courses?
Software Engineering Fundamentals	Choose the least useful courses?
Software Engineering Fundamentals	Name other courses that you look forward to in your competency?

- User can provide rating against each parameter. Rating should b/n 1 to 5 (1 being poor and 5 being excellent). This is mandatory.
- User should also provide comments for each parameter to describe on how the program helped him/her to improve.
- System should capture the information about the details like empid, name, and project id of the person who gives the feedback for analysis purpose. System should NOT ask the user to enter the details. These should be captured based on the user login

2.2 As a unified engineer I should be able to view the feedback that I have given

#### **Acceptance criteria**

- System should provide list of parameters grouped against each category
